Logistics, Warehousing & Procurement

Business Process Manager

To enable a successful ERP implementation in Q4, we're extending our project team.
We're looking for an enthusiastic teamplayer with:

Experience in developing and managing logistics (transport planning),
warehouse and procurement processes.

Experience in ERP implementation and IT-savviness.

A hands-on and solution oriented mentality.

A dedication to bring structure in a complex environment by asking critical questions.

Eagerness to make things happen within strict deadlines by setting the right priorities.

The ability to work autonomously while also leading a small team of key users.

A passion for coaching, training and guiding key users and end users during implementation.

An engaging communication style both in French, Dutch & written English.

We offer

Assignment until the end of 2025, with a possible extension into 2026.

5 days a week.

Annual leave: from 04/08 to 15/08.

Immediately available, within 14 days.
